

---

## Statement of Qualifications – Bill Prehm

- **Antero Resources**
  - *White Oak Project*
    - *Route selection, easement acquisition, permitting, material procurement and installation of a 21 mile, 20 inch pipeline*
    - *Design, procure, site acquisition and install an 8400 bhp, 120 MMcfd compressor & dehydration station.*
    - *Route selection, easement acquisition, material procurement and installation of approximately 20 miles of 16 inch low pressure gathering lines to new natural gas wells.*
  - *Doddridge County, WV Water Pipeline*
    - *Route selection, easement acquisition, permitting, material procurement and installation of a 35 mile, 24 inch OD fresh water HDPE pipeline.*
  - *Due Diligence*
    - *Review Clearwater Water Treatment Plant*
    - *Complete Enterprise Risk Assessment of gas processing and pipeline delivery system.*
    - *Monitor progress of 3<sup>rd</sup> party pipeline and gas processing projects.*
  - *Pipeline Routing, ROW Acquisition & Permitting*
    - *We assist the Client by identifying pipeline alignments that are buildable with minimal environmental impacts. Once identified and approved we assist with the Right of Way acquisition and with obtaining all permits.*
  - *Compressor Station Site Acquisition*
    - *Site selection and acquisition of various compressor station sites in West Virginia and Ohio.*
  - *Project Planning and Budgeting*
    - *Prepare and maintain 5 year midstream development plan.*
    - *Annual CAPEX budgeting and tracking for midstream group.*
- **DCP Midstream**
  - *Spindletop Storage Expansion Project*
    - *Drill and complete a 5700 ft leaching/injection/withdrawal well*
    - *Leach out a salt cavern with a 8 million bbl final net volume and 6.3 Bscf working gas volume*
    - *Complete piping modifications to increase compressor station daily throughput from 500 to 700 MMscf/d*
    - *Upgrade existing Superior 16STGB station compressor engines to meet 0.8 gr/hp/hr NOx emission limit.*
  - *Wattenberg Pipeline Integrity/Expansion Project*
    - *Inline Inspection (ILI) survey and anomaly repairs of 385 miles of 6 inch diameter NGL pipeline.*
    - *Nitrogen purge and hydrostatically test of 385 miles of 6 inch diameter NGL pipeline.*
    - *Install 9.5 miles of new 6 inch diameter NGL pipeline with custody transfer meter*
    - *Install 500 hp, 21,000 bbl/day grass roots NGL pump station*
  - *Collbran Valley II Compressor Station*
    - *Grass Roots Compressor Station – Detailed design and Installation of two (2) 4890 bhp Caterpillar 3616/Ariel JGZ-6 Reciprocating compressors and ancillary equipment.*

---

*5L Strategies brings an exceptional blend of boots on the ground experience that translates into measurable results with a commitment to building business through “successful” projects and repeat clientele.*

- 
- *Lake Murvaul Pipeline*
    - *Grass Roots Pipeline – Design, easement acquisition, material procurement and installation of a 30 mile, 20 inch diameter natural gas pipeline, a custody transfer measurement station and slug catching facilities*
  - **Alliance Wood Group Engineering**
    - *Chapita Train II Expansion*
      - *Process and detailed design for the installation of a 27,000 hp Siemens motor driven two stage centrifugal compressor and ancillary equipment into Anadarko Chapita Gas Plant.*
    - *Douglas Compressor Station Expansion*
      - *Process and detailed design for the installation of a 20,000 hp GE P6T20DLE Turbine driven PCL802 centrifugal compressor and all ancillary equipment into the El Paso Douglas Compressor Station.*
  - **El Paso Corporation**
    - *Yuma Compressor Station*
      - *Detailed design and installation of two electric motor driven Cooper WH62 reciprocating compressors and ancillary equipment.*
    - *Raton Expansion Project*
      - *Pipeline Looping Project – Design, easement acquisition, permitting, material procurement and installation of 100 miles of 16”, 20” and 24” pipeline in an existing pipeline corridor.*
      - *Design and installation of piping modifications at the Morton County, Kansas Compressor Station*
      - *Design and installation of piping modifications at the Campo, Colorado Regulator Station*
      - *Re-cylinder two Ariel JGC-4 reciprocating compressors at the Kim Colorado Compressor Station*
      - *Design and installation of 1700 hp addition (Ariel JGC-4 Compressor /Caterpillar G3606TALE Engine) at the Beaver County Oklahoma Compressor Station.*
      - *Design and installation of three customer delivery meter stations near Trinidad Colorado.*
    - *Natural Buttes Gas Plant*
      - *Design & Installation of a 48” ID low pressure filter separator*
      - *Design & Installation of a installation of a 50,000 gallon NGL storage*
    - *Bluewater Compressor Station*
      - *Compressor Station Replacement – Process and detailed design of three Solar Taurus 60 turbine compressors and auxiliary facilities*
    - *Florida “C” Station*
      - *Compressor Station Expansion – Detailed design and installation of one Solar Mars 100 turbine compressor and auxiliary facilities*
    - *Lordsburg “C” Station Expansion*
      - *Compressor Station Expansion – Detailed design and installation of one Solar Mars 100 turbine compressor and auxiliary facilities*
    - *Line 1105 Replacement*
      - *Anomaly Repairs – A total of 8300 ft of 20” and 3400 ft of 24” gas pipeline segments were replaced in 55 locations on the 88-mile pipeline.*

---

*5L Strategies brings an exceptional blend of boots on the ground experience that translates into measurable results with a commitment to building business through “successful” projects and repeat clientele.*
